FIG. 5 is a perspective view of the device 100 showing the front face 150 and the side face 158. The device 100 includes a front face 150, a side face 158, and a top face 156. The front face 150 is defined by the front edge 152 and the side edge 154. The side face 158 is defined by the side edge 154 and the top edge 156. The top face 156 is defined by the top edge 156 and the front edge 152. The device 100 is shown in a perspective view, with the front face 150 and the side face 158 being the primary faces visible. The front face 150 is a rectangular face, and the side face 158 is a rectangular face. The top face 156 is a rectangular face. The front edge 152 is the edge of the front face 150 that is closest to the viewer. The side edge 154 is the edge of the front face 150 that is furthest from the viewer. The top edge 156 is the edge of the top face 156 that is closest to the viewer. The device 100 is shown in a perspective view, with the front face 150 and the side face 158 being the primary faces visible. The front face 150 is a rectangular face, and the side face 158 is a rectangular face. The top face 156 is a rectangular face. The front edge 152 is the edge of the front face 150 that is closest to the viewer. The side edge 154 is the edge of the front face 150 that is furthest from the viewer. The top edge 156 is the edge of the top face 156 that is closest to the viewer.

FIG. 7C

FIG. 7D is a top view of the device 200, showing the layout of the device. The device 200 is a rectangular structure with a central region 710. The central region 710 is surrounded by a ring of material 714. The ring 714 is divided into four quadrants by two perpendicular lines 730 and 736. The quadrants are labeled 706, 708, 720, and 724. The central region 710 is also divided into four quadrants by two perpendicular lines 726 and 728. The quadrants are labeled 706, 708, 720, and 724. The device 200 is shown in a perspective view, with the top surface and the side surfaces visible. The top surface is divided into four quadrants by two perpendicular lines 726 and 728. The side surfaces are divided into four quadrants by two perpendicular lines 730 and 736. The device 200 is shown in a perspective view, with the top surface and the side surfaces visible. The top surface is divided into four quadrants by two perpendicular lines 726 and 728. The side surfaces are divided into four quadrants by two perpendicular lines 730 and 736.

FIG. 29A

FIG. 29B is a perspective view of the bottom of the device of FIG. 29A, showing the bottom surface 2910 and the bottom surface 2912. The bottom surface 2910 is a flat surface, and the bottom surface 2912 is a curved surface. The bottom surface 2910 is defined by the bottom surface 2910a and the bottom surface 2910b. The bottom surface 2912 is defined by the bottom surface 2912a and the bottom surface 2912b. The bottom surface 2910a is a flat surface, and the bottom surface 2910b is a curved surface. The bottom surface 2912a is a flat surface, and the bottom surface 2912b is a curved surface.
